MORAL LIFT

Better On Every Level

Effective Solutions To Various Lifts

We Plan, Design, Manufacture And Install.....

Why MORAL LIFT? Why Are People Choosing MORAL LIFT?

MORAL LIFT Brand Introduction

MORALLIFT MISSION

- Being a high-end brand with sustainable development, constantly improving its own value and sharing it with the customers and staff.
- Provide exceptional customer service coupled with quality products and lifting solutions.

MORALLIFT CORE VALUES

- Sensible and Trustworthy
- Positive Development
- Progress and Innovation
- Gratitude and Self-evaluation

MORALLIFT VISION

- To share common pursuit of understanding, learning, ethics and gratitude
- To realize the values of life and the pursuit of happiness
- To be honest and innovate, To execute, and evaluate oneself
- To create mutual understanding and to progress together with the clients

VERTICAL LIFT PLATFORM / FREIGHT PLATFORM

Vertical lift--Lead rail hydraulic lifting platform is used for transfer cargo between different floors. Self-height is about 150-300mm. This platform can install on the ground directly or make one pit. Hydraulic drive, steady working and simple operate.

This machine provide fast, efficient, convenient and safe access to or from mezzanines, balconies, basements, and between levels in multiple story buildings. They can be installed for through-floor, interior or exterior applications. The principle components of machine include guide columns, carriage and a mechanical or hydraulic actuating mechanism.

We offer the most complete line of machine from mechanical to hydraulic to fully automatic, customized systems for automated manufacturing and warehousing operations. machine are available in capacities from 100kg. to 100,000kg.

MAIN FEATURE

- Chain lifting platform features lifting the goods through the different floors.
- Chain lifting platform----hydraulic driven and lift by chain.
- Special lifting chain and have long use life.
- The close height is low so don not need pit installation.
- Closed type structure ,safe and easy to clean.

3D PLATFORM LIFT FOR SPRAYING ROOM

The 3D lift is ideal for auxiliary equipment for the spray industry. it can work in three dimensions at the same time, effectively reduce the labor intensity, improve work efficiency.

MAIN FEATURE

- Horizontal Movement (X-axis)
- Extended Movement (Y-axis)
- Vertical Movement (Z-axis)
- Payload 300kg
- Emergency Stop Button
- All the circuits are anti-explosion
- All size can be customized according to different spray booth

PRODUCT SHOW

ALUMINUM ALLOW WORK PLATFORM

Aluminum alloy hydraulic lift table: it is a new-era product through brand-new design, adopts new aluminum molding material. The lift table has tiny swing, because of high-strength molding material. Handy and light appearance makes it freely exert maximum lifting ability in limited room. As a result, this product makes it easy to carry out high-altitude working by one person. The power sources could be 220V/380V or chargeable battery.

MAIN FEATURE

- Equipped with hydraulic and chains lifting mechanism, and high strength welding steel frame, high strength aluminum column.
- The double column lift simultaneously, controlled by limit switch, and towed by two chains to ensure safety.
- Both of the platform/ground control panels are safety voltage.
- It is widely used in indoor and outdoor cleaning activities, such as ceilings, walls, windows, pipelines and exhibition build-up.

HOME WHEELCHAIR LIFT

If you have difficulty using stairs, or use a wheelchair or mobility scooter, then a residential vertical lift is a great way to ensure that you can always safely and conveniently enter and exit your home. All of our porch lifts are designed to be completely resistant to the harshest weather conditions and are an affordable alternative to residential elevators

MAIN FEATURE

- Vertical elevating system. This durable and easy-to-use vertical lift is suitable for indoor or outdoor applications requiring vertical transportation up to 10 meters.
- It can be directly installed into the ground without architectural supporting pits and easy to operate.
- Its hydraulic system offers passengers smooth and comfortable transportation and different safety devices remove every hiding risk.
- Emergency Descending: When there is no power or malfunctions, manually descend the device
- It's suitable for large-sized newly-built residential estates and those areas where there is compact land resource and etc.
- This machine max.lifting height is 10,000mm.
